

Budget & Logistics

A dedicated solution to optimize training activities

CHALLENGE

Training departments face major budget cuts while learning and training needs are growing. Training professionals receive increased pressure to precisely track costs and expenses in order to train more with less. In addition, Instructor Led Training (ILT) still accounts for more than 60% worldwide and requires precise logistics management. It is becoming increasingly critical to improve the management of resources, such as trainers and material assets, in order to increase utilization rate.

In this context, Budget & Logistics is the solution to optimize training budgets and align them with the organization's strategy. It also allows users to optimize cost control and administrative productivity.

Train more with less through qualitative and cost-effective resource management

BENEFITS

Optimize training budgets

- Support for multiple hierarchical budget structures
- Automatic and precise expense management
- Real-time and exhaustive tracking of remaining budgets

Drive detailed forecast

- Predictive volumes and cost computation
- Complete scenario-based training plan
- Streamlined financial prioritization and planning

Automate logistics planning

- Predefined organizational configurations
- Built-in scheduling process
- Detailed status and milestone tracking

Enhance resources management

- Graphic overview of all training KPIs
- Customized thresholds for critical assets
- Real-time conflict alerts

"We save money while gaining more flexibility, efficiency and professionalism: Our training offer supports the development of our employees as well as the performance of the company."

Christophe Guillery,
Training Director
Areva
